| **Facilities** | |
| Can we please get a food or healthy juice truck to come onto campus during lunch break? | We have had food trucks on campus in the past.  However, not enough students were purchasing from them to make it worth their while.  If you know of a food truck that is interested in coming on campus, we would allow it at no charge.  They would just need to coordinate with the college president. |
| MTI should hold the graduation ceremony in a bigger facility to accommodate more friends and family members of graduates. I personally would not mind if tuition was raised a few hundred dollars more to help pay to rent a bigger place to hold the graduation ceremonies. | Unfortunately, the next biggest facility would far exceed the number of people we would have attend and would make for a seemingly empty ceremony.  We will look into alternative room configurations at our current facility to see if we can somehow accommodate more guests. |
| I often get to school 10 minutes before my first class (sometimes i come earlier) and my first class starts at 10:30. there's often never parking but there's always at least 4 cars that are taking up multiple spots. The security guard should be able to give tickets for double parking because it wastes so much space and it's very inconvenient. | The security guard is on-campus during the afternoons and evening.  We will ask that he monitor for vehicles taking up more than one spot.  In the morning, please report this type of situation to the front desk, so we can leave a notice on the vehicle's windscreen ourselves. |
| Class room 100 is not set up properly to be able to have instructors do any type of lesson on the screen or power-point, as students are not able to see screen and follow along on their computers for those that need to do so or instructed to do so. This room would be ideal for keyboarding or other classes that may not require it. | Thank you for the suggestion.  We will look  at reworking that room or offering different classes in that space. |
| **Academics** | |
| It would sure be nice if we could check our grades online for every class. A lot of students have complained about this as well, right along with me. At a junior college they have this ability and grades are current within a day or so of tests etc. MTI students are left in the dark and guessing. This does not seem right. All classes should be on Moodle or something similar. | More and more classes are being added to Moodle and students should have access to their grades even if it is not on Moodle. Instructors can make sure that students have up-to-date grades. Please be sure to share this concern with your department chair. |
